“I TORRAZZI” INFORMATION CENTRE - MODENA (ITALY)

The Information Centre for the “I Torrazzi” Park in Modena is an all-timber construction with solid-webbed structural members exposed on the interior side, and it called for the use of a total of 156 m3 of timber, of which 137 m3 of **Xlam** and 19 m3 of **laminated wood**. The technical features of the timber building allow the avoidance of 4,470 kg/year of greenhouse gas emissions into the atmosphere. This building secured the ANCI “**2010 environmental and social sustainability award**” for Modena City Council and it was chosen by the **Emilia Romagna Sustainable Architecture Observatory Selection Committee** as one of the 12 architectural projects in Emilia Romagna offering a tangible interpretation of **the concept of sustainability in relation to the environmental, social and energy spheres**

PRODUCT SPECIFICATION

Prefabricated building
Localization:
Intended use: Recreational Centres
Architetural and structural design: Eugenio Ansaloni Studio
Total area: ft
