

VILLA USCO - PARMA

A NEW CREATION ENTIRELY IN XLAM

A new single-family home is being built in Parma, characterized by an impressive window on the living area. The 470 square meter structure is entirely in Xlam, a choice that has made it possible to design a building with important energy saving and earthquake resistance characteristics. The lighting of the internal staircase is distinguished by the presence of skylights on the flat roof.

PRODUCT SPECIFICATION

Single-family Residence
Localization: Parma
Intended use: Detached or Duplex homes
Architetural and structural design:
Total area: 470ft

BUILDING SYSTEM

XLAM

Reasons for choosing the Xlam system

The Xlam system is a technical innovation in the construction of timber homes and buildings. The system's exceptional versatility allows the creation of a wide range of architectural constructions, including multi-storey **timber buildings**. The system assures **optimal thermal insulation** and a high level of **fire resistance**, a fast drying process and exceptional **acoustic insulation**.

About the Xlam system

The Xlam panel is composed of crossed layers bonded together, making the construction system extremely **versatile**. Composed of 99.4% timber and 0.6% adhesives, Xlam is considered to be a monolithic material **capable of supporting very high loads and withstanding external stresses and seismic activity**.
